There's no waiting in lines at this amusement park! Build the rides shown in this guide or make your own custom creations! There is no wrong way to build. Just follow these instructions to help you get started.

Note: Before you begin, make sure you have 2 new "AA" batteries in the motor's red hand control. See the last page in this guide for more information on proper battery care.

¡No hay que esperar en colas en este parque de diversiones! ¡Construya los recorridos que aparecen en esta guía o haga sus propias creaciones especiales! No hay ningún modo de crear que sea incorrecto. Sólo tendrá que seguir estas instrucciones como ayuda para ponerse en marcha.

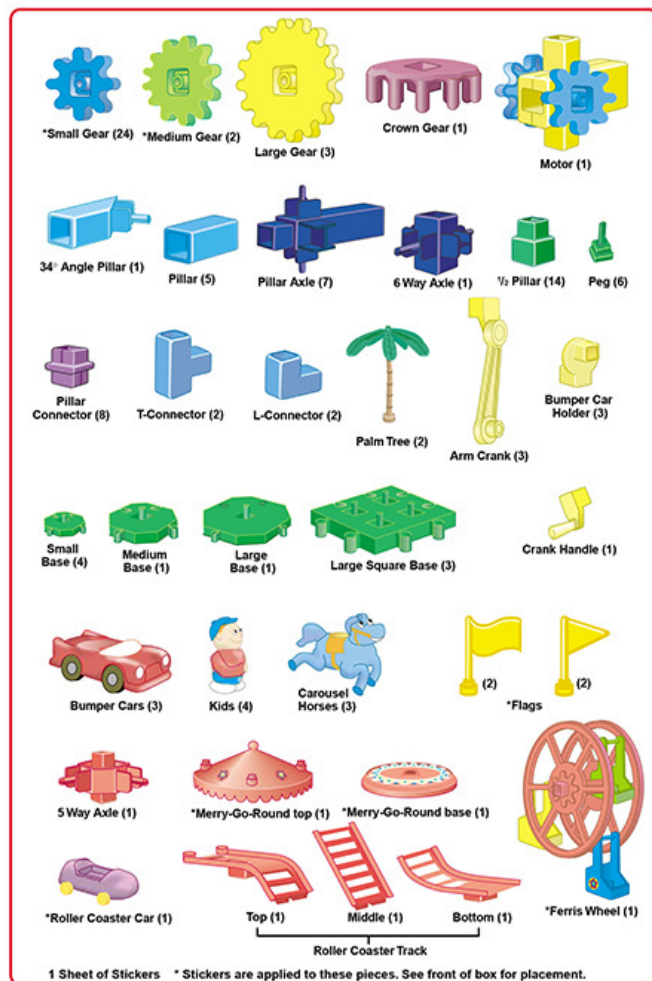

Nota: Antes de comenzar, asegúrese de que tiene dos baterías "AA" nuevas en el control de mano derecha del motor. Vea la última página de esta guía para obtener más información sobre el cuidado adecuado de las baterías.

Kein Warten in langen Schlangen bei diesem Vergnügungspark! Bauen Sie die in dieser Anleitung gezeigten Bahnen oder entwerfen Sie Ihre eigenen Kreationen! Es gibt keine falschen Aufbauideen. Befolgen Sie als Starthilfe einfach die Anleitungen.

Hinweis: Bevor Sie anfangen, vergewissern Sie sich, dass zwei neue „AA“ Batterien in der roten Handsteuerung des Motors eingebaut sind. Auf der letzten Seite dieser Anleitungen finden Sie zusätzliche Informationen zur Batteriepflege.

Aucun besoin de faire la queue pour ce parc d'attractions. Construis les manèges présentés dans ce guide ou tes propres créations ! Il n'y a pas de mauvaise façon de construire le manège. Tu n'as qu'à suivre ces instructions pour t'aider au début.

Note : Avant de commencer, assure-toi d'avoir 2 nouvelles piles 'AA' dans le contrôle manuel rouge du moteur. Consulte la dernière page du guide pour plus d'information sur l'entretien des piles.

DIZZY FUN LAND

BUMPER CARS

STEP 1

Join two square bases.

Building Hint: Try to build from the base up.

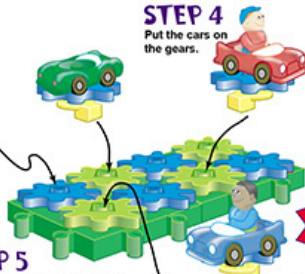

STEP 2

Add eight small gears.

STEP 4

Put the cars on the gears.

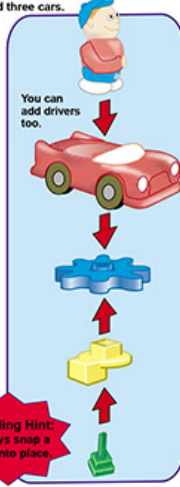

STEP 5

Put a palm tree on the last gear. It will turn as the cars go around.

DIZZY FUN LAND is built in sections. The completed rides will be joined together in the last steps.

STEP 3

Build three cars.

You can add drivers too.

Building Hint: Always snap a peg into place.

All the cars gears should move together. You have finished the first ride.

DIZZY FUN LAND

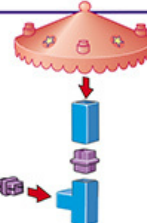

MERRY-GO-ROUND

STEP 1

Build a tower to hold the horses.

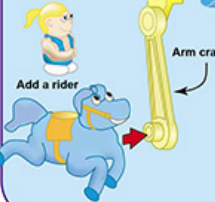

The Ferris wheel will attach here.

Snap a peg inside 1/2 pillar above.

STEP 2

Build three carousel horses with gears.

Add a rider

Arm crank

Large gear

Large base

(Step 2)

(Step 2)

Small gear

Small base

© Learning Resources, Inc., Vernon Hills, IL 60061 (USA)

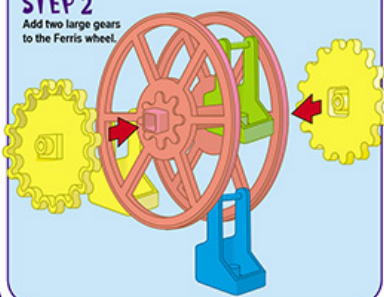

STEP 1

Build this support on the base. The motor should turn this gear and the three gears on the base.

STEP 2

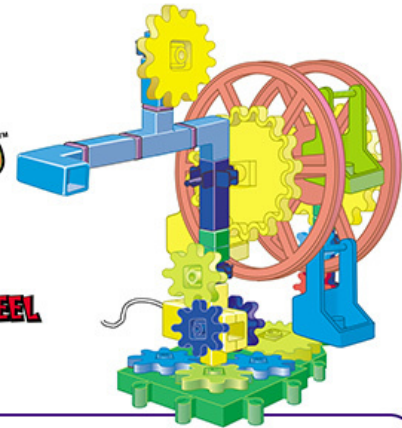

Add two large gears to the Ferris wheel.

Put three small gears on a square base.

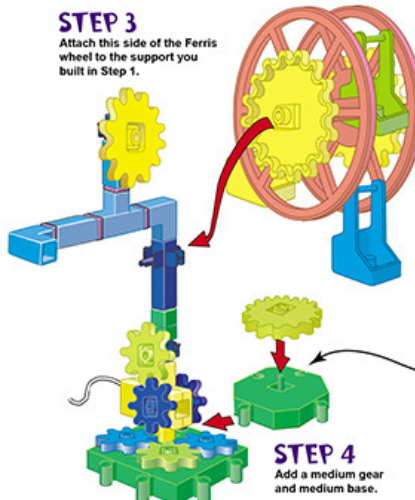

DIZZY FUN LAND™

FERRIS WHEEL

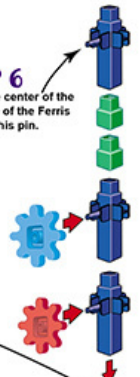

STEP 3

Attach this side of the Ferris wheel to the support you built in Step 1.

STEP 5

Build this support for the other side of the Ferris wheel.

STEP 6

Attach the center of the other side of the Ferris wheel to this pin.

STEP 7

Attach this small base to the medium base.

ROLLER COASTER

STEP 1

Build the support for the top of the roller coaster track.

STEP 2

Add two small gears and a hand crank.

STEP 3

Build the track base.

STEP 5

Add two flags.

STEP 4

Build the roller coaster track.

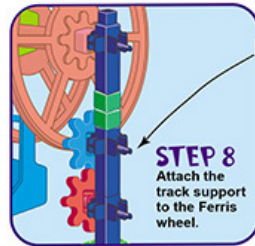

STEP 6

Attach the support.

STEP 8

Attach the track support to the Ferris wheel.

STEP 7

Attach the track base to the bottom of the roller coaster track.

PUT ALL THE SECTIONS TOGETHER

Join the Ferris wheel and roller coaster track to the merry-go-round.

The two bases join together here.

Next add the bumper cars.

Add flags to the top of the merry-go-round and roller coaster.

Put a car and driver on the top.

Turning the crank will release the car and driver!

You've done it!
The Dizzy Fun Land is now complete.

STEP 1
Start by building a pair of legs.

STEP 2
Add two flags to the top of the legs.

STEP 3
Add arm cranks to each leg.

STEP 4
Join the legs together with the motor in the middle.

STEP 5
Add an extra gear to the motor in front.

STEP 6
Attach three gears to each leg.

STEP 7
Add six more gears to the back, three on each leg.

The motor should turn all the gears.

DIZZY ROBOT

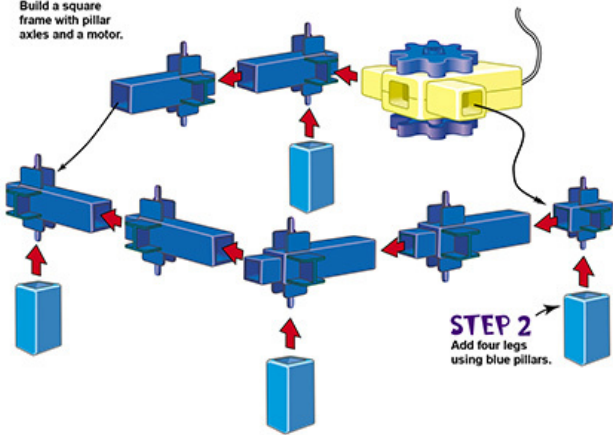

STEP 8
Build the head.

STEP 9
Put a small gear on the back of the head.

STEP 10
Attach merry-go-round base, peg, 1/2 pillar and medium gears to the extra gear on the front of the motor.

STEP 1

Build a square frame with pillar axles and a motor.

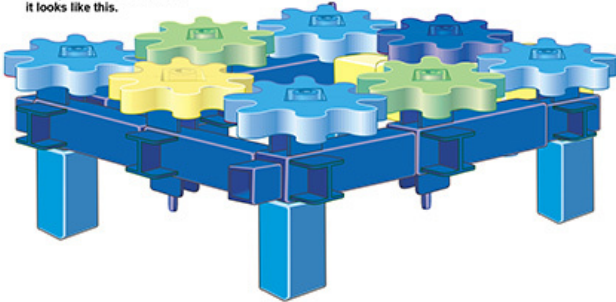

STEP 2

Add four legs using blue pillars.

STEP 3

Add seven small gears to the top of the frame so that it looks like this.

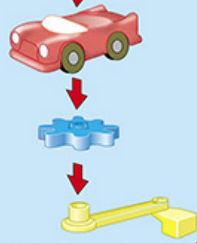

DIZZY SWINGING CARS

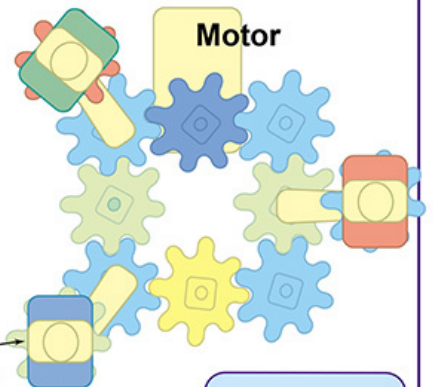

STEP 4

Make three cars with drivers on small gears and arm cranks.

STEP 5

Attach arm cranks on the bottom of the cars to the gear base as shown here.

Turn on the motor for dizzy swinging car action.
